## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

This is in response to Applicants' election filed June 24, 2003.

Applicant's election with traverse of Group I, claims 1-28 and 52-69, in Paper No. 8 is acknowledged. The traversal is on the ground(s) that a single search and examination covering all claims (of different inventions) would not place undue burden on the Examiner. This is not found persuasive because searching and examining multiple groups of different inventions would place a serious burden on the examiner. Also, the restriction requirement, of paper no. 7, based on different groups of the inventions, whether a single search or not for all of the different inventions would not prevented the inventions from distinct and different from each others.

The requirement is still deemed proper and is therefore made FINAL.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 53-66 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 53, on line 7, "the first sample" lacks a proper antecedent basis.

Claims 54-66 are indefinite because they include the indefiniteness of the claims on which they depend.

---

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2878

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim 52 is rejected under 35 U.S.C. 102(b) as being anticipated by Pedersen 4,491,730.

Pedersen discloses a photometric detection method and apparatus comprising: a sample system constructed and arranged to position first (21) and second (27) portions of a sample separately and in isolation from each other; at least one source (11) of electromagnetic radiation positioned to irradiate the portions; and at least one absorption detector (26, 35, 44) positioned to detect absorption of the portions.

Claims 53-66 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Art Unit: 2878

Claims 1-28 and 53-69 are allowable over the prior art of record because the prior art fails to teach a system and method comprising, among other features: a sample system or a sample chamber to position first and second portions of a sample separately and in isolation from each other or forming parallel fluid channels; a source of electromagnetic radiation positioned to irradiate the portions; a detector to determine diffraction of the electromagnetic radiation by the portions; and a pump constructed and arranged to displace the sample with a second sample, or a diffraction detector to detect diffraction of electromagnetic radiation at the chamber channels.
